

**Compliance to regulation (EC) No 1907/2006 of the European Parliament and of the Council  
- Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)**

REACH (Registration, Evaluation and Authorization of Chemicals) entered into force on June 1st, 2007. The purpose of this regulation is to ensure a high level of protection of human health and the environment.

Substances which are subject for substitution have been selected, listed and issued in the candidate list by the European Chemicals Agency (ECHA) as Substances of Very High Concern (SVHC). The complete and latest list of SVHCs can be found on the ECHA website: <https://echa.europa.eu/en/candidate-list-table>.

REACH instructs the manufacturer to provide customers with sufficient information on Substances of Very High Concern (SVHC) contained in products in concentration above 0.1% weight by weight (w/w) to allow safe use of the product.

Substances of Very High Concern (SVHC) according to the "Candidate list" for Annex XIV of the REACH ordinance are not included in FM Mattsson Denmark products in concentrations above 0,1 % (w/w) per substance and product with the following exceptions in some products:

Lead (CAS Number: 7439-92-1 / EC Number: 231-100-4) is on the "Candidate list" since 27<sup>th</sup> of June 2018. In our products, lead is being applied as alloying constituent in non-ferrous metals (e.g. brass) respectively components made of non-ferrous metals in concentrations > 0,1 %.

1,2-Dimethoxyethane (EGDME) (CAS Number: 110-71-4 / EC Number: 203-794-9) is on the "candidate list" since 18.06.2012. EGDME is a constituent of CR P2 lithium block batteries.

FM Mattsson Denmark maintains constant and on-going checks to be able to give the latest information in this matter regarding compliance to REACH regulation.

As FM Mattsson Denmark is neither producing chemicals or preparations (mixtures of chemicals) nor importing them to the EU, the company are only affected by REACH obligations as a downstream user. Registration obligations are therefore inapplicable for us.
